The Carillon

AT BELLEVIEW STATION

APRIL 2019 • SONGS OF SPRING

## A “Magical” Time in France

*Some residents embraced the French theme more than others!*

*Mitch the Magician blew the crowd away with his mindreading abilities and his impressive sleight of hand skills.*

*The Front of the House really embraced our French theme!*

## The Nation’s Library

With its mission to preserve and provide knowledge, the Library of Congress was founded April 24, 1800, in Washington, D.C., and has grown to become the largest library in the world.

Beginning as a small collection of books housed inside the new U.S. Capitol building, the library served as a resource for members of Congress. During the War of 1812, the British set fire to the Capitol, destroying the library. To help rebuild it, former President Thomas Jefferson sold his personal collection of 6,500 books to Congress.

The library eventually outgrew its space in the Capitol, so a separate building was constructed. When the massive structure opened in 1897, it was praised for its stunning architecture and artwork. Around this time, the library also expanded its purpose, making its materials more accessible to the public and serving as the national library of the American people.

*(Continued on back.)*

## Bursting With Blossoms

A sure sign of spring is the beautiful blossoming of many trees. Here are a few varieties that put on a seasonal show:

**Dogwood** – Native to North America, the dogwood is famous for its stunning springtime display of white or pink blooms, making it a popular landscaping tree since America’s earliest days. Both George Washington and Thomas Jefferson had dogwoods planted at their estates.

**Japanese flowering cherry** – This tree is the star of the National Cherry Blossom Festival in Washington, D.C., as well as other spring celebrations around the world. Its branches display delicate pink-white flowers that bloom for just a short time early in the season.

**Magnolia** – Prized for their large, fragrant flowers in shades of white, pink, red, purple and yellow, magnolias are often associated with the South, but varieties are grown in every region.

**Eastern redbud** – Dainty clusters of magenta blooms attract butterflies and birds to the redbud, which grows primarily in the eastern half of the U.S.

# The Nation's Library (Continued)

Now comprising three buildings, the ever-growing Library of Congress contains more than 167 million items – books, films, photos, newspapers, maps, sheet music and more – from all over the globe.

Those who live outside of Washington, D.C., can make virtual visits to access the library's collections through its website, LOC.gov.

## Military Camouflage

Blending in with the environment is an essential aspect of military operations. Camouflage uniforms were developed to help soldiers disguise themselves on the battlefield.

Prior to the 1900s, combat troops wore colorful uniforms that made them visible to generals and distinguished them from the enemy. This changed during World War I with the rise of trench and aerial warfare, which made it crucial for soldiers to remain undetected. The U.S. Army began to employ artists to create camouflage uniforms.

Camouflage comes from the French word *camoufler*, meaning “to disguise.” Made to keep military forces hidden, camouflage designs are based on the terrain where units are deployed and are usually mottled patterns in shades of green, brown, black and gray. One of the earliest patterns was called frog skin, with spots that blended in with jungle foliage. Over the years, designs resembling trees, tiger stripes and even chocolate chip cookie dough have helped hide soldiers in forest, desert and urban locations.

Military camouflage design has become more complex, with computers now generating digital patterns based on neuroscience.

## Hit Ideas at the Ballpark

With baseball season in full swing, touch base with this look at some ballpark traditions.

**Presidential pitches:** It was 1892 when Benjamin Harrison became the first U.S. president to attend an MLB game. But in 1910, William H. Taft started the custom of sitting presidents throwing out a ceremonial first pitch.

**Concession stands:** Chicago's Wrigley Field, home of the Cubs, is the birthplace of permanent concession stands, which started in 1914 with a single kiosk that offered hot dogs, peanuts and popcorn.

**Numbered uniforms:** Dating back to 1916, teams had struck out with wearing small numbers on their uniform sleeves. Then in 1929, the New York Yankees had more visible 12-inch numbers sewn onto the backs of players' jerseys so fans could identify them. Other MLB teams followed their lead.

**Organ music:** The first chords of live organ music to be played at an MLB ballpark sounded out at Wrigley Field in April 1941.

**Night games:** On May 24, 1935, the lights were turned on for big league baseball's first night game, held at Crosley Field, then home of the Cincinnati Reds.

**Foul balls:** The owner of the Chicago Cubs, Charlie Weeghman, was the first team owner to allow fans to keep foul balls hit into the stands, starting in 1915. Most ballparks had ushers retrieve the balls so they could be put back into play.

Make your  
“someday”  
today.
